Cooling 1kw fiber laser cutting equipment is quite easy with the help of [industrial recirculating chiller](#) CWFL-1000. It is an intelligent laser water chiller whose temperature stability reaches $\pm 0.5^{\circ}\text{C}$. Air cooled laser water chiller CWFL-1000 is designed with high & low temperature control systems, cooling the fiber laser source and the laser head respectively at the same time.

[industrial recirculating chiller](#) CWFL-1000 is manufactured by Guangzhou Teyu Electromechanical Co., Ltd (also known as S&A chiller) which is a China-based industrial water chiller manufacturer with annual sales volume of 70000 units. It is very popular among fiber laser cutting equipment users.

[industrial recirculating chiller](#)

CWFL-1000 features:

1. $\pm 0.5^{\circ}\text{C}$ precise temperature control;
2. The intelligent temperature controller has 2 control modes, applicable to different applied occasions; with various setting and display functions;
3. Dual temperature to satisfy different needs of fiber laser device and the optics;
4. Multiple power specifications; CE approval; RoHS approval; REACH approval;
5. Optional heater and water filter.

The warranty for the chiller is 2 years.

Price: \$ 2,500.00
